10  <body>
11      <div class="container-fluid">
12          <div class="row">
```
▲

REQUIRED

Please make sure to use semantic tag to define landmarks on the page. For example, `<header>` tag should replace this `<div>`.

Your current page layout can also utilize the following semantic tags:

- `<section>`
- `<main>`
- `<article>`
- etc.

```
13              <div class="col-md-4">
14                  <img class="img-responsive" src="./image/udacity.png" alt="udacity logo">
15              </div>
16              <div class="col-md-8 site-name right">
17                  <h1>WENZHE XU</h1>
18                  <h2>FRONT-END PORTFOLIO</h2>
19              </div>
20          </div>
```
▲

SUGGESTION

Code Quality

Add empty blank line between blocks of code to improve readability. For example:

```
<div class="foo">
    <div class="bar">
        <!-- content -->
    </div>

    <div class="bar">
        <!-- content -->
    </div>
</div>

<div class="foo">
```

```
        <!-- etc -->
    </div>

21          <div class="row">
22              <div class="col-md-12">
23                  <hr>
24              </div>
25          </div>
26          <div class="row">
27              <div class="col-md-12">
28                  <img class="img-responsive site-image" src="./image/site-image.jpg" alt="front-end image">
29              </div>
30          </div>
31          <div class="row">
32              <div class="col-md-12 featured-work">
33                  <p>Featured Work</p>
34              </div>
35          </div>
36          <div class="row">
37              <div class="col-sm-4">
38                  <img class="img-center" src="./image/portfolio.png" alt="portfolio">
39                  <p class="project-name"><a href="https://github.com/xuwenzhe/build-a-portfolio-site" target="_blank">Portfolio</a>
40                  <p class="project-url">https://github.com/xuwenzhe/build-a-portfolio-site</p>
41              </div>
42              <div class="col-sm-4">
43                  <img class="img-center" src="./image/leetcode.png" alt="data structure and algorithm">
44                  <p class="project-name"><a href="https://github.com/xuwenzhe/leetcode" target="_blank">Leetcode</a></p>
45                  <p class="project-url">https://github.com/xuwenzhe/leetcode</p>
46              </div>
47              <div class="col-sm-4">
48                  <img class="img-center" src="./image/notes.jpeg" alt="self notes">
49                  <p class="project-name"><a href="https://github.com/xuwenzhe/selfnotes" target="_blank">Selfnotes</a></p>
50                  <p class="project-url">https://github.com/xuwenzhe/selfnotes</p>
51              </div>
52          </div>
53      </div>
```

AWESOME

Tip ⚡

For a fun practice, we can arrange some social icons in `<footer>` section by including LinkedIn, Github, etc. links.

One quick way to implement this is to use FontAwesome. There are many different logo icons that we can choose to fit the social icon list.

```
54  </body>
55  </html>
```
